PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building scalable React.js applications, fintech platforms, CRM systems, and data-driven dashboards. Skilled in TypeScript, frontend architecture, state management, performance optimization, API integrations, and role-based systems. Strong background in full-stack development (Laravel/PHP) and collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Frontend	React.js, TypeScript, JavaScript (ES6+), Next.js, Redux, Zustand, React Query / TanStack Query, React Hooks, Context API, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, React Router, Axios, Webpack, Vite, Responsive Design, Performance Optimization
Testing & Code Quality	Jest, React Testing Library, ESLint, Prettier
Backend	Node.js, PHP, Laravel
Databases	MySQL, PostgreSQL, MongoDB
Cloud & DevOps	AWS, Azure, Git, CI/CD
Concepts	REST APIs, JWT/OAuth Authentication, RBAC, Agile / Scrum, Memoization, Lazy Loading, Custom Hooks, Code Splitting, Error Boundaries, Server State Management, Component Architecture

WORK EXPERIENCE

Senior Frontend Engineer | Finlabs India Pvt. Ltd. | Jan 2025 – Present | Pune

- Developing and scaling a multi-module React.js fintech platform used by 100+ sales and operations team members
- Optimized API calls through lazy loading, code splitting, memoization, and server-state management techniques, reducing dashboard load time by approximately 40% across key modules.
- Developed a reusable React component library and scalable component architecture, improving feature delivery speed and consistency across 5+ modules.
- Integrated secure JWT/OAuth authentication and developed role-based dashboards serving multiple user access levels
- Developed unit tests using Jest and React Testing Library for critical UI components, improving code reliability and reducing regression issues.

Full Stack Software Engineer | Xebec Communication Pvt. Ltd. | Apr 2022 – Dec 2024 | Pune

- Developed and delivered web applications using React.js, Laravel, PHP, and MySQL across 10+ client projects
- Developed analytics dashboards that eliminated manual reporting effort for internal operations teams
- Integrated third-party APIs and payment gateways handling 1,000+ transactions with stable uptime
- Improved UI responsiveness across desktop and mobile, reducing reported UI bugs by ~25%

Software Engineer | India Active Software Inc. (ICTRD) | Jun 2021 – Apr 2022 | Nagpur

- Developed backend-driven applications using PHP, CodeIgniter, Laravel, and MySQL
- Developed internal tools and dashboards that automated manual workflows, saving the team several hours per week
- Improved system stability by debugging and refactoring legacy codebases across 3+ active projects

- Collaborated with senior developers to build GIS-based web applications and map visualization features.
-

KEY PROJECTS

AI Chatbot – Full-Stack Gemini-Powered Chat Application – *React.js* | *API* | *Node.js*

Live Demo: <https://chatbot-falshruti.vercel.app/>

GitHub: <https://github.com/Falshruti/Chatbot>

- Built a production-ready AI assistant supporting multimodal inputs, multiple Gemini models, chat history management, and AI-powered document analysis.
- Implemented email authentication with bcrypt password hashing (12 salt rounds) and server-side session management
- Added multimodal capabilities: PDF resume analysis for AI-driven company suggestions, image upload and Gemini Vision analysis, and AI image generation via Pollinations AI
- Supported multiple concurrent conversations with persistent local storage, per-chat custom system prompts, and a model selector (Gemini 2.5 Flash/Pro, 1.5 Flash)
- Designed a premium dark-theme UI with glassmorphism and smooth animations

Finexa – React.js Fintech Platform - *React.js* | *REST APIs* | *JWT Authentication* | *Role-Based Access Control*

- Developed scalable role-based dashboards and transaction workflows for internal fintech operations teams used by 100+ users.
- Optimized API calls and React rendering pipeline, reducing dashboard load time by approximately 40% across high-traffic modules.
- Built reusable React components using custom hooks and component architecture patterns to improve maintainability and scalability.
- Implemented lazy loading, code splitting, and error boundaries to enhance application performance and user experience.

Custom CRM & Lead Management System - *React.js* | *Node.js* | *MySQL* | *REST APIs*

Live Demo: <https://github.com/Falshruti/CRM-Lead-Management-System>

- Developed a complete CRM handling 500+ leads with tracking, dashboards, and automated reporting features
- Automated lead workflows, reducing manual follow-up effort and improving team response time

E-Learning Platform - *React.js* | *PHP* | *MySQL* | *REST APIs*

Live Demo: <https://learninghub.finlabsindia.org/>

- Developed frontend and backend features for course management serving 200+ active users
- Integrated third-party APIs ensuring smooth data flow across modules with less than 1% error rate

College Management Portal - *React.js* | *Laravel* | *MySQL*

- Developed a multi-role system managing student records, attendance, and fee tracking for 1,000+ students
 - Designed reusable component architecture supporting long-term maintainability across 4 user roles
-

EDUCATION & CERTIFICATIONS

B.E. Electronics & Communication Engineering | Nagpur University (2016–2020) | CGPA: 9.04 / 10

PHP Developer Certification | Codeocity | 2021

Hands-on training in PHP, MySQL, AJAX, CodeIgniter, and real-world project development
